HIPS	93-98	98-103	103-108	108-113	113-118

Tips for using our Body Torque Size Chart

- Get another team member to take your measurements to ensure accuracy.
- Hold the tape firm, not tight.
- If two out of the three parameters fall within a certain size, that is your size.
- If your measurements are borderline between 2 sizes, go to the lower size for a tighter fit, or the higher size for looser fit.
- When taking your measurements, wear your sport undergarments that you would usually wear when competing in the specific sport.
